

Liang Ying (Claire) Lin

UX Researcher · Cross-Cultural Research & AI-Native Workflows
Kanagawa, Japan · +81 80-1026 8616 · clairelinsparkle@gmail.com

Cross-cultural UX researcher with hands-on experience running usability sessions, user interviews, and synthesis for AI and digital products across Asia-Pacific markets. Fluent in English, Japanese, Mandarin Chinese and Taiwanese with direct experience reviewing user-facing content across Japanese, Taiwanese, and global markets. Actively integrating AI tools into research planning, synthesis, and reporting workflows. Energized by fast-paced, AI-native environments where research speed and rigor have to coexist, and by the chance to do international fieldwork.

PROFESSIONAL EXPERIENCE

UX Research & Stakeholder Engagement Intern · Upstage Japan · Tokyo, Japan Oct 2025 – Mar 2026

- Planned and ran 8+ usability sessions on enterprise AI/ML systems, synthesizing qualitative and quantitative findings into structured insight reports for product, business, and client-facing teams.
- Applied AI tools (LLM-assisted transcription, synthesis, and reporting) across the research workflow to accelerate analysis cycles and communicate insights more efficiently to non-technical stakeholders.
- Evaluated 3+ enterprise AI systems against structured decision frameworks; findings directly informed 2 client proposals and internal product documentation.
- Coordinated cross-functional alignment between product, business, and client-facing teams to translate user research into actionable feature and UX recommendations.

Localization QA & Cross-Cultural Content Reviewer · Lionbridge · Yokohama, Japan Apr 2025 – Jul 2025

- Reviewed user-facing digital content for Sony and Nexon across multiple Asia-Pacific markets, evaluating tone, cultural accuracy, and accessibility across linguistic contexts.
- Worked at scale across Japanese, Taiwanese, and English user-facing surfaces with direct hands-on exposure to the cross-border content quality and localization issues that surface in global gaming marketplaces.

UI/UX & Data analysis Intern · Ogilvy Taiwan · Taipei, Taiwan Jul 2025 – Aug 2025

- Synthesized consumer insights and built customer journey frameworks for 3 global brands (Diageo, IKEA, Moderna), presenting findings to senior director-level stakeholders.
- Developed a 4-segment stakeholder model mapping audience touchpoints to brand activations which were adopted by the Taiwan client team as a planning reference.
- Operated across FMCG, retail, and pharma verticals in a multinational agency environment, sharpening cross-market insight communication.

EDUCATION

M.S. in Media Design · Keio University — Graduate School of Media Design · Tokyo, Japan Sept 2024 – Present

- GPA: 4.07 / 4.30 · Focus: Human-Computer Interaction, Service Design & Strategic Innovation
- Thesis: Temporal Embodiment Threshold (TET) — designed and executed a mixed-methods user study (n=30) on time-delayed embodied feedback. Owned end-to-end research design, participant recruitment, hardware-based experimental setup, behavioral data annotation, and statistical analysis.
- Market Entry Project: led user research and consumer value analysis for Indonesian brand AGAM entering the Japan market, coordinating across international partners and local stakeholders.

Exchange — Social Sciences · Waseda University · Tokyo, Japan Sept 2022 – Aug 2023

- Urban policy, cross-cultural communication, and civic design; direct experience navigating Japanese institutional and community stakeholder environments.

B.A. in English Instruction · National Tsing Hua University · *Hsinchu, Taiwan*

Sept 2019 – Jun 2024

– GPA: 4.18 / 4.30 · Minor in Secondary Education

– Thesis: Code-Switching in English Language Education — mixed-method qualitative study integrating interview design, qualitative coding, and structured reporting.

SELECTED PROJECTS & AWARDS

- ElderLink — AI Fall Detection for Independent Aging** · IE Venture Competition · *2nd Place*

2025

– Conducted user research with elderly users and family caregivers to validate problem framing and surface adoption barriers around privacy and consent in passive monitoring.

– Translated research insights into product and UX strategy for a privacy-preserving Wi-Fi CSI sensing system (ESP32 hardware + React Native alert app); competition prototype, no formal validation.

– Built end-to-end in under two months with no supervisor and won 2nd place out of 40+ teams; project generated investor interest.
- Risou — Biodesign & Sustainable Material Interaction** · Biodesign Challenge · *Terra Prize Winner*

2025

– Award-winning speculative design project addressing circular economy and net zero principles, recognized at the intersection of material science, design research, and sustainability strategy.
- Design Mate — MR Interior Design Tool** · Meichu Hackathon (with Logitech) · *3rd Place*

2025

– Led user research, cross-functional team coordination, and stakeholder presentation for an international collaboration combining mixed reality and spatial UX.

CORE COMPETENCIES

- Languages:**

English (native) · Japanese (JLPT N2) · Mandarin Chinese (native) · Taiwanese (conversational) · French (B1, conversational)

Research Methods:

Usability testing, user interviews, concept evaluation, mixed-methods studies, participant recruitment, behavioral data analysis, VoC synthesis, customer journey mapping

Research Tools:

Maze, UserTesting (familiarity), Google Forms, Qualtrics, Figma, Notion, Miro

AI in Research:

LLM-assisted synthesis and reporting, AI-supported transcription and tagging, applied AI for research operations and insight communication

Cross-Border Work:

Experience across Japan, Taiwan, U.S., Indonesia, and pan-APAC localisation; comfortable across time zones, cultures, and languages

Other Tools:

PowerPoint, Excel, TouchDesigner, Unity (data visualization)
